PROFESSIONAL SUMMARY

Backend-focused Software Engineer with 4+ years building production systems in transportation, healthcare, and IoT. Owns Node.js/TypeScript APIs, SQL data models, and AWS infrastructure (EC2, S3, CloudFront, Route 53, Lambda, API Gateway, IAM, SSM, Secrets Manager). Sole backend engineer for a multi-city platform with 1,000+ daily transactions per route; currently integrating payment providers (OpenPay, NetPay) with retries and idempotency. Ships CI/CD (GitHub Actions, Docker); mentors a frontend teammate and works with clients. Additional Flutter/BLE experience for mobile and device connectivity.

TECHNICAL SKILLS

Backend: Node.js, TypeScript, Express, REST APIs, OpenAPI/Swagger, JWT, authN/authZ, payment integrations (OpenPay, NetPay), idempotency, retries, PHP

Cloud & DevOps: AWS (EC2, S3, CloudFront, Route 53, ACM, Lambda, API Gateway, IAM, SSM, Secrets Manager, X-Ray), GitHub Actions, CI/CD, Docker, Nginx, PM2, AWS SAM (IaC)

Databases: SQL Server, PostgreSQL, relational modeling, query optimization, Flyway, Firebase

Architecture & Practices: API design, cloud architecture, deployment automation, production troubleshooting, code review, documentation, mentoring, client communication

Mobile & IoT: Flutter, Dart, BLE, MQTT, OTA updates, hardware/device integrations

PROFESSIONAL EXPERIENCE

AJ Electronic Design (Startup) — Software Engineer

Remote | October 2022 – Present

- Lead software delivery in a 2-person team: technical direction, API contracts, AWS architecture, releases; mentor frontend developer via reviews.
- Own client technical discussions: requirements, trade-offs, and backend/infrastructure proposals.
- Built CI/CD (GitHub Actions) for frontend and backend, cutting deployment overhead by ~75%.

PathBus — Transportation Platform | Node.js • TypeScript • SQL Server • AWS • Payments

- Sole backend engineer for 10+ cities and 1,000+ daily transactions per route (GPS tracking, revenue analytics).
- Architected REST APIs, SQL Server schema, and AWS production infrastructure; operated releases and production support.
- Integrating OpenPay and NetPay payment flows with retries and idempotency to handle duplicate charges and provider failures safely.

Biosense — BLE Medical Platform | Flutter • BLE • Node.js

- Shipped cross-platform Flutter BLE app validated on 100+ devices; reduced measurement error from 15% to near-zero.
- Built PHP/MySQL admin portal for 25+ users; reduced report generation time by ~80%.

Mabe — Smart Refrigerator Platform | Flutter • Raspberry Pi • AWS

- Delivered AI-assisted Flutter apps (iOS/Android/Raspberry Pi) for 200+ connected units on AWS-backed infrastructure.

Oficialía Mayor (Government of Hidalgo) — Software Engineer Intern

On-site | January 2022 – June 2022

- Contributed to an internal government web platform under real delivery constraints.

SELECTED PROJECT

Artifact Repository Service | TypeScript • AWS SAM • Lambda • API Gateway • S3 • CloudFront

- Serverless APT artifact publishing platform with secure upload/activation, CloudFront, OpenAPI, tests, and IaC.
